

# JaZZ

The compact Cash Deposit System  
with stacker, safebag sealer and ink protected safe

**Banknotes protected by  
our IBNS ink staining sys-  
tem.**

**End-2-end solution. The  
guard has no access to  
the banknotes.**

The JaZZ is the only  
cash deposit sys-  
tem that combines  
efficiency over the  
whole life span  
with high security.

It is specifically de-  
signed to meet the  
requirements of CIT  
companies.

**The JaZZ Cash Deposit System is designed for retailers that want to have their cash turnover automated. Once deposited into the JaZZ it is like having the cash already on the bank account.**

The CIT company is connected to the JaZZ and plans the collection. Depending on the services of the CIT company the cash value can be credited the same day it was deposited. Furthermore most of the CIT companies do insure the cash in the JaZZ.

The retailers can reduce the security risks by having the overflow of the cash desks quickly deposited in the JaZZ. Every banknote is verified to its authenticity, every deposit is receipted by the integrated printer.

### Hardware features of the JaZZ

- Touchscreen
- Single note validator: 60-100 banknotes/min
